

Evergreen Boilers No Longer Include LP Kit and Sentinel X100 Water Treatment

Below is the announcement that will be released to our distributors. Our target release date of the Marketing Bulletin is scheduled for 6/18/18.

Dear Weil-McLain Distributors,

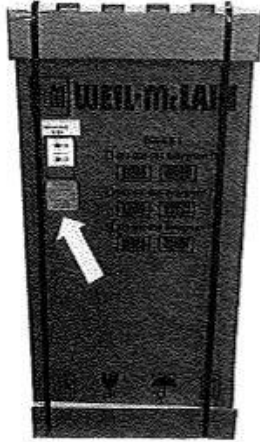

Weil-McLain is no longer including the Natural Gas to Propane Gas conversion kit, as well as the Sentinel X100 Inhibitor and X100 test kit, with the Evergreen boilers as standard equipment.

The use of Sentinel X100 inhibitor is still required for the Evergreen boilers; please refer to the current Weil-McLain Trade Price Schedule (TPS#57, page 78) for X100 part numbers and pricing.

The chart below identifies the starting CP numbers of Evergreen boiler models without the LP conversion kit, Sentinel X100 inhibitor and associated X100 test kit. Shipment of Evergreen boilers without these items is just starting.

Model	Evergreen	
Boiler Sizes	70 -155	220 - 399
Starting CP #	CP7642026	CP7656532

We added a new label positioned next to existing printed CP labels, as illustrated below, as another way to identify if an Evergreen boiler shipping carton does not include the LP conversion kit, the X100 inhibitor and associated test kit. Please rotate your stock accordingly.

**NOT INCLUDED WITH
EVERGREEN BOILER**

- NG to LP CONVERSION KIT -
If Needed, Order Kit to Match Boiler
EVG 70: 540-202-837, EVG 110: 540-131-088
