

## Water Softening

Soften water throughout your home to protect your appliances and eliminate hard water spots and stains.

A. O. Smith water softeners reduce excessive calcium and magnesium to solve hard water problems throughout your home.

- Reduce hard, damaging scale buildup on faucets, appliances, water heaters, shower heads and walls.
- Spend less time scrubbing hard water spots on glasses, dishes and appliances.
- Save money on utility bills and cleaning supplies.
- Self-cleaning sediment prefilters mean you'll never again have to fuss with a filter replacement.
- Never run out of soft water with fast and quiet regeneration.

## Water Conditioning

Reduce chlorine taste and odor along with scale buildup to lengthen the life of pipes and appliances.

The A. O. Smith water conditioner combines obsessively engineered filtration and salt-free scale reduction technology.

- Reduce up to 97% of chlorine taste and odor from everywhere in your home.
- Save money on expensive appliance repairs and replacements by reducing scale buildup in your pipes, appliances, and water heater.
- Experience softer, healthier hair and skin by reducing drying and damaging chlorine.
- Dual tank design prevents clogging or media channeling and provides six years of water conditioning.
- No electricity or drain required.

## Water Filtration

Get clean, filtered water for all of your drinking and cooking needs.

A. O. Smith water filters reduce contaminants and undesirable color, taste and odor, so you can drink with confidence.

- From hydration to cooking, early morning coffee, smoothies, or soup, you now have access to clean, filtered water whenever you need it.
- Protect your family from contaminants including fluoride, lead, cysts, chlorine, mercury, asbestos, PFOA/PFOS and more.
- A. O. Smith filtration systems are rigorously tested and certified for contaminant reduction.
